

ISCB DC RSG

Bioinformatics, Genomics & Computational Biology Workshop

Summer 2016

When: June 15, 2016

Where: Biosciences Research Building 1103,
University of Maryland, College Park

Overview

The ISCB DC Area Regional Student Group (RSG) will be hosting a FREE one day workshop series focused on various topics in bioinformatics, computational biology and genomics. The goal of the meeting is to bring together researchers from different institutions around the region to share ideas and learn from one another, and to foster collaborations across organizations.

Workshop Topics

- **Genome-scale metabolic modeling**
- **Web application development for computational biology**
- **Bacterial genome assembly & annotation**
- **Analyzing sequence motifs through maximum entropy modeling**
- **Obtaining and Analyzing Data from the The Cancer Genome Atlas Project**
- **Co-expression network analysis using RNA-Seq data**

Registration

Registration for the meeting is free and optional. Lunch will be provided for all those who register by June 10th.

Deadline: Friday, June 10
